

PATCHETT NESTS

- These galvanized steel rear roll-away nests for laying hens, built to a high quality, are made in blocks 1.6m long and 1, 2 or 3 tiers high.
- They are supplied in flat pack with instructions and 4mm pop rivets, for assembly on the farm.
- Eggs roll onto 20cm wide wire egg trays fitted with plastic buffer strips.
- Wooden flight rails can be raised to exclude the birds from the nests, and the blocks can stand on the ground or be screwed to posts.
- The nests have been in production and in use on farms since 1992.

Depth of nests, front to back, with flight rails extended 90cm

Height of block

- 1 tier 64cm
- 2 Tier 1.02m
- 3 Tier 1.4m

• There are 2 models :-

Model 1 Communal Nest

- * Each 1.6m long block has 3 nests on each tier, as shown in the photographs on this page.
- * Each nest is 526mm wide x 320mm front-to-back and has a soft plastic Netlon mesh bottom supported by galvanized rectangular wire mesh.
- * Our recommended ratio of hens to nests is 18 maximum.

| | | | | |
